# Instruction of keyboard lock function

In order to the follow procedure:

1. As fast as you can, press the "NIGHT/ESC" button three times (try to do that within 0,5 second), after the activation of the keyboard lock function you will observe text "Lock" at the led screen (see the second point).

Press three times „NIGHT/ESC" button
(within 0,5 sec)

2. Next, the text "Lock" is displayed which means an activation of the lock function (as below).

3. If you are wondering how could you unlock a keyboard, please do the whole procedure again (like we described above).

Press three times „NIGHT/ESC" button
(within 0,5 sec)

Correctly conducted procedure will be signaled with 'unlo' message at your led screen. After that your keyboard will be activated and ready to work.
